

Ocius Vx670 Wi-Fi & Bluetooth

– setting a new standard

Versatile

One of the world's smallest all-in-one wireless handheld payment devices, Ocius Vx670 with Wi-Fi or Bluetooth connectivity sets a new standard for streamlined, smart and ultra-secure payment processing. Ocius Vx670 offers convenient and chic 'pay at table' functionality and is perfect for a wide range of hospitality applications and locations including restaurants, bars and stadiums.

This stylish and versatile device can operate as a standalone terminal, or as part of a fully integrated system. The intelligent 'bill lodging' system means that any table can be serviced by any terminal, simply by entering the table number.

Ocius Vx670 can instantly print itemised bills, and deal effortlessly with split bills, group payments, refunds and gratuities. In the high turnover and hectic hospitality sector, Ocius Vx670 delivers unmatched benefits to your business.

Tough, resilient and resistant to knocks, drops and spills, the Ocius Vx670 terminal is built to withstand the rigours of the most challenging and fast-paced environments, whilst its ergonomic, lightweight styling, large, white backlit display and blue backlit keys ensures speed and ease of operation.

Flexible

Wi-Fi and Bluetooth connectivity options offer unprecedented flexibility within an elegant casing. Ocius Vx670 achieves an impressive combination of style, functionality and ease of use, all encompassed in a sleek terminal powered by sophisticated and secure software. In addition to standard transactions, merchants who choose Ocius Vx670 can benefit from a range of added-value capabilities such as loyalty programmes, e-gift and mobile vouchers.

All Commidea payment terminals are part of Commidea's Managed Service, which uses our Payment Card Industry Data Security Standard (PCI DSS) Level 1 certified processing infrastructure. Our service and systems operate 24/7/365 to provide constant, resilient and reliable payment processing for your business.

Support

To benefit from the versatile and flexible Ocius Vx670 solution, all you need is a merchant account with a UK acquiring bank. We provide all the required technology and devices. The terminals connect to the Commidea ICP data processing centre, a fully PCI DSS Level 1 certified and secure 24/7 service processing over one million transactions each day.

All businesses using the Ocius Vx670 have access to the services of our Helpdesk seven days a week, as well as WebCom, our internet-based management information solution. WebCom provides real-time terminal management and instant reporting of every transaction that Commidea has processed for your business, irrespective of the sales channel.

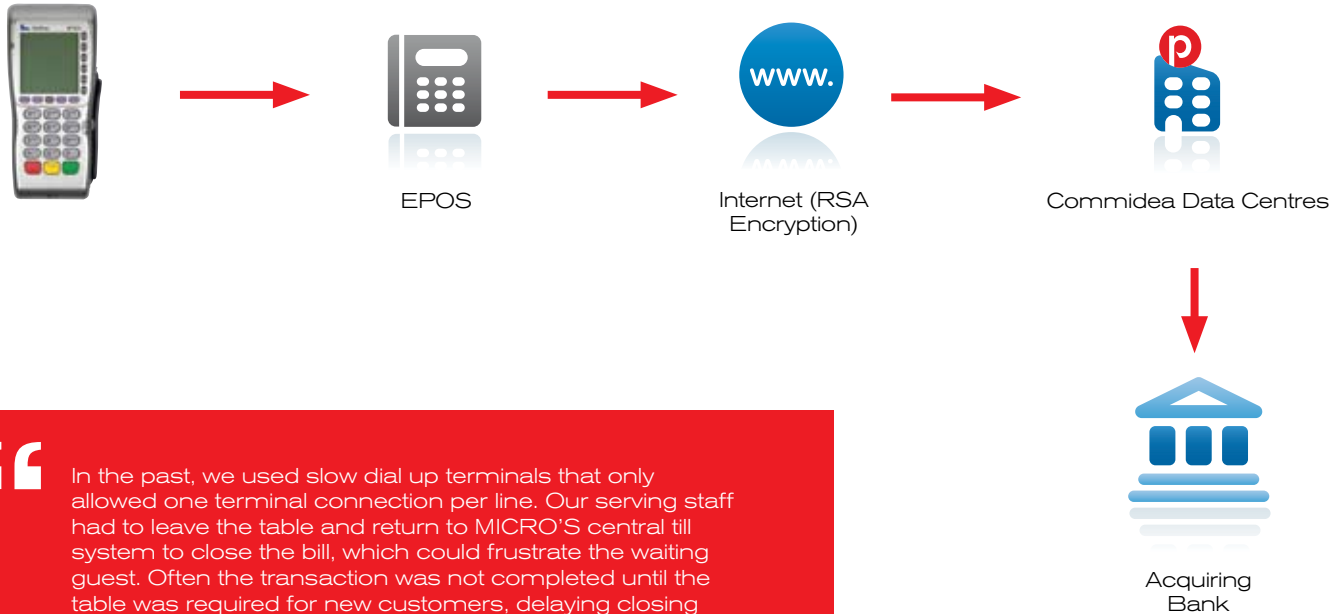

Secure access to WebCom is available from any internet-connected PC, enabling you to carry out account maintenance, update records, search transactions and download the latest software. Data can be exported in standard formats ready to import into your own back office applications, or can be customised to suit your specific requirements.

“

In the past, we used slow dial up terminals that only allowed one terminal connection per line. Our serving staff had to leave the table and return to MICRO'S central till system to close the bill, which could frustrate the waiting guest. Often the transaction was not completed until the table was required for new customers, delaying closing bills for tables on the EPoS solution which skewed our statistical data. Now it is dealt with swiftly at the table. 'Pay at Table' makes a significant difference to service levels, credit card and guest reporting. The solution is great for our guests, stores and administrative teams.

Ocius Vx670 Wi-Fi and Bluetooth – from the experts

Commidea is the market leader in secure, innovative payment solutions. Every solution that we develop is designed to benefit our customers – to make life easier and improve business performance.

We are known for our rigorous research and development. We invest to ensure that we remain ahead of market developments. No product is released until it is fully certified by the leading UK acquiring banks.

The first pre-certified Chip & PIN solution, the first integrated contactless payment solution and first PA-DSS approved point-to-point encryption payment solution to be launched in the UK all came from Commidea. Our focus is firmly on bringing technical innovation to market – to benefit you.
