

Background and history

Since 1984 Retail Systems Group has been at the forefront of design, supply and support of business management systems for small and mid sized retailers.

Many years of working with such well known companies such as New Look, Mark One, Bay Trading, Levi Strauss and The Tussauds Group have given us the experience and expertise to be a leading provider of solutions to today's new and emerging retail organisations.

We specialise in the provision of EPoS, E-Commerce and Stock Management solutions based on Microsoft technologies to retailers in the UK and Republic of Ireland.

We are a Microsoft Certified Partner and the UK's leading supplier of the Microsoft Dynamics Retail Management System. We also develop and support our own range of solutions.

Based in Birmingham UK, we employ 30 people, all involved in the technical aspects of our system provision, be it in Sales, Installation or Support.

We look after over 200 retail clients, with our main focus being on clothing, footwear, gifts, home ware and visitor attractions.
